

A1 Language Learning Opportunities

About this session...

The topic of language learning and teaching is embedded throughout the Erasmus+ programme: all actions can be used to promote language learning and teaching (Learning mobility and cooperation projects), and special boosts can be provided through targeted language learning support for mobility and quality recognition of projects (European Language Label).

Participants will be invited to discuss how the Erasmus+ programme can better support language learning in the future, in line with the policy objectives in the field. The session will allow for in-depth discussions around the language learning support, such as a revamped Online Language Support. Participants will be able to contribute with their ideas, experiences and wishes for this future tool, which will benefit all participants of the programme in the future.

At the end of the session, the objective is to come up with a clearer picture on how programme opportunities can cover the needs of the organisations and participants in Erasmus+ and at the same time be able to promote language learning through the programme.

Something to think about...

We welcome your active participation and kindly ask you to reflect on the following questions before the session:

- 1) How is the topic of language learning and teaching being supported by the programme: clarity in terms of communication, visibility, tools for rewarding good projects?
- 2) How can we best support participants to learn a language through the online language support tool?
- 3) How can we best support participants, such as young learners in schools and vocational education, who are not able to learn a language independently by using an on-line tool?
